

REVÊTEMENTS DE RAQUETTES AUTORISÉS

ITTF DU 1^{ER} JUILLET 2007

AU 31 DÉCEMBRE 2007

LISTE N°28 ÉGALEMENT DISPONIBLE SUR LE SITE : www.ittf.com (Équipement, revêtements de raquette)

DATE DE PUBLICATION : avril 2007

Les informations qui apparaissent pour la première fois dans la liste 28 sont en italique.

*La liste sera publiée à nouveau en octobre 2007 (liste 28B). Tous les ajouts seront alors en **gras** et italique.*

Les mousses sombres (noir, bleu, marron, vert, pourpre, rouge) ne devront pas être utilisées sous des revêtements translucides rouges (la plupart des revêtements rouges sont translucides). Il est de la responsabilité du joueur d'utiliser un revêtement de raquette dont l'aspect est rouge vif, et l'utilisation d'une mousse sombre sous un revêtement translucide revient à rendre le caoutchouc illégal. Même si le revêtement de raquette apparaît dans cette liste sans référence à la mousse, la loi 2.4.3. régit l'utilisation de la mousse.

Beaucoup de revêtements de raquette comportent des textes additionnels sur les caoutchoucs fabriqués en dehors du nom de la marque et des noms des fournisseurs, et cela ne les disqualifie pas de la liste des Revêtements de Raquette Autorisés. Cependant, le texte indiqué dans la liste doit être imprimé (par exemple, Butterfly Sriver L et Butterfly Sriver S ont, en plus, "D13"). De tels textes peuvent être placés n'importe où dans le secteur réservé au texte sur le caoutchouc.

Comment reconnaître un revêtement dans cette liste :

1. Être certain d'ouvrir la bonne liste (Vérifier la date de validité, elles sont publiées 2 fois par an, en avril et en octobre. Les fichiers pdf sont disponibles sur le site Internet www.ittf.com à tout moment.)
2. Les noms du fournisseur et de la marque, ainsi que le logo ITTF, doivent être clairement visibles sur le caoutchouc.
3. Ces noms doivent apparaître dans cette liste

En cas de doute, vérifiez l'image ou la photo sur www.ittf.com.

Légende

[R] ou [B] : indique que la marque n'existe qu'en rouge ou noir respectivement.

"Long" : dans la rubrique "type" est utilisé quand le rapport du picot (hauteur/diamètre) est supérieur à 0,9.

: indique une version homologuée avec un renforcement du textile, à utiliser sans mousse.
